10 Year Road Plan

Drainage Improvements

The cost of drainage improvements is yet to be identified.

The City of Aztec is currently engaged in Engineering studies to provide guidance for the Hampton and Blanco Arroyos as well as the Kokopelli Subdivision.

There are a number of possible engineering solutions each of which are expected to cost \$millions.

Consider the cost of a single box culvert under any given road will cost in the range of \$200,000 to \$300,000.

Preliminary estimates range to more than \$20 million to improve the Hampton, Blanco and Williams Arroyos and address surface drainage on city streets.
